Documentation Driven Development

1. Write Tests
2. Write Code
3. Write Documentation
4. Rewrite Code

1. Write Tests
2. Write Code
3. ~~Write Documentation~~
4. Rewrite Code

Definition of Done

1. Write Tests
2. Write Code
3. ~~Write Documentation~~
4. Rewrite Code

Get functional,
but unusable code!

No Documentation

or

Bad Documentation

makes your code

unusable!

1. Write Documentation

2. Write Tests

3. Write Code

Writing documentation first change your perspective!

Writing it from the perspective of your customer (user of your code)!

Don't document your code - code your document!

Summary

* Code your documentation

* Make a customized documentation skeleton

* Iterate over your documentation

* Find a groove that works for you
