"Debugging is twice as hard
 as writing the code in the first
place."

- Brian Kernighan

PHP 11. call_user_func_array(*uninitialized*, *uninitialized*) /DEV/dagobert/vendor/laravel/framework/src/Illuminate /Routing/Controllers/Controller.php:138

```php
echo 'var: ' . $var;
die('stop 001');

print_r($array);
var_dump($array);

error_log('step 2 - var: ' . $var);
debug_print_backtrace();

Script to Evaluate:

```
Transaction::find($id)
```

Result:

```
(
    (null) => (
        unguarded => 1
        snakeAttributes => 1
        resolver => (
```

Close   Evaluate

```php
106      *
107      * @param  int  $id
108      * @return Response
109      */
110     public function destroy($id)
111     {
112         $ta = Transaction::find($id);
113         if ($ta === null) {
114             Log::error('unbekannte ID: ' . $id . '!');
115         } else {
116             $ta->attachments()->delete();
```

Break
